PROJECTS

BlueCollorHub — [Live](#) | **Tech Stack:** Next.js, Tailwind CSS, MongoDB

A full-stack web platform built with the vision of “Bringing Local Talent to Global Opportunities.” It connects blue-collar workers with clients, helping them showcase their skills and get hired directly without middlemen. Featuring authentication, location-based search, and a responsive UI, it empowers local workers to gain visibility and access better job opportunities through technology.

RGUKT-Health Companion

Built a Flask-based web app that predicts diseases from user symptoms using machine learning models. Integrated MongoDB for user authentication and data storage. Provided detailed health info including precautions, medications, diets, and workouts through a responsive UI.

StayInTouch – Social Media Web Application

Developed a full-stack social media platform using React, Tailwind CSS, Node.js, Express, and MongoDB. Implemented secure user authentication with JWT and features like posts, likes, comments, follow/unfollow, and real-time messaging. Built a responsive, interactive UI and discover page for users to connect globally. Focused on enhancing UX and seamless social interactions.
